Date & Place of Birth 02 May 1977, Bihac, Bosnia And Herzegovina

Education

1990 - 1994 SŠTC – Slavko Žardin, Bihac, Bosnia And Herzegovina - Technician for electronic and automated systems.

Languages

Bosnian	Mother tongue
English, Serbian, Croatian.	Fluent
German	Basics

Experiences

Apr. 2022 – present	SAASolutions – Sarajevo, Bosnia, Lead DevOps.
Sep. 2021 - Apr. 2022	ATN - LLC – Kentucky, USA CTO – Chief Technology Officer.
Dec. 2018 – Sep. 2021.	Raiffeisen Bank – Sarajevo, Bosnia Networks Systems Infrastructure & Services Expert, DevOps,
Jun. 2018 Nov. 2018	Technical Overhauling Institute – Sarajevo, Bosnia Networks Systems Infrastructure & Services Architect, DevOps, NetOps & SecOps Lead.
Nov. 2017 Jun. 2018	TVbeat – London, UK DevOps engineer
Apr. 2017 Oct 2017	Sappi – Gratz, Austria Infrastructure & platform engineer
Aug. 2014 Aug. 2016	Snowfall – Stockholm, Sweden Networks Systems Infrastructure & Services Architect, DevOps, NetOps & SecOps Lead.
Aug. 2010 Aug. 2014	Privredna Banka – Sarajevo, Bosnia Systems & Networks Administrator, Software Developer
Nov. 2006 – Dec. 2009	Unicredit Group – Sarajevo, Bosnia Networks Systems Infrastructure & Services Architect
Jan. 2006 – Oct. 2006	Team Consulting – Sarajevo, Bosnia Systems & Networks Administrator, Software developer
Feb. 2002 – Dec. 2007	NTCHS Comtrade – Sarajevo, Bosnia Networks Systems Infrastructure & Services Architect
1996 - 2001	Various companies, banks and contracts, etc, and I wish to keep it single page cv. Back in late 90's I did commit or two to GNU and FreeBSD. I was Savannah administrator and started my own hosting platform that have 100% of uptime since then up to these days.

Skills

Operating Systems	FreeBSD family, Fedora, Centos, RHEL, Ubuntu, Debian, Gentoo, OL, GNU/Linux, ec2, Kali-Backtrack, IBM Aix, IBM AS400, vmware esx/esxi, vcenter, clouds freebsd/bhyve, qemu/kvm, aws, gcloud, azure, openstack, Windows servers since nt 4.0 up to present, Commodore64/128, Amiga128, Apple from Eve up to present.
Software	HA proxy, nginx, apache, MySQL, MariaDB, Oracle, consul, saltstack, puppet, ansible, chef, k8s, OpenShift, EPG & AE, nagios, zabbix, newrelic, docker, vagrant, virsh, ipmesh, and so on. I even do my own AI and ML in my own home labs :)
Programming	C, C++, python, php, html, css, bash, awk, Lua, go, api, mvc, oop
Hardware	Cisco, IBM, HP, SnowBall, CheckPoint, PaloAlto, Junniper, Barracuda, Kemp, Blue Coat, etc...
Useful links	https://ws.bosnic.net
Linkedin	https://www.linkedin.com/in/ebothen00b/

Couple words about me:

I am married, father of 2 boys <https://amar.bosnic.net> and <https://denial.bosnic.net> and they are top performers in the schools scores.

Need to say that I am a **self taught** about **all these things**, from building up computers, computer networks, hypervisors, clouds, etc, to the programming languages and various operating systems... Note to **strong troubleshooting skills**, and **problem solving options** literally out of my pocket, since I am doing this professionally for 3 decades in a row, without a issues, down time etc. I am straight forward person into **delivering solutions** whatever is required from me. Based on my experience I learned over the years what is important and what is not, and I am still all for learning anything that your company can teach me. Since I am self taught be aware that here and there may be some gaps in my knowledge base about all 7 layers of the OSI model that Internet is constructed of, or that particular RFC standard you may ask me, or, "Write me array" in that particular language, and such things, **from top of my head**, maybe not possible, but that is why we have search engines? In some reasonable time I will probably came up with short and long term solutions for any given task. I am system & network administrator, but also a software developer, who know how to write application layers properly, secured and most important, working for years. Feel free to read all **recommendation letters**. I spent almost 15 years in 3 largest pan euro banks keeping them up and running with all the systems such as firewalls, email servers, swift systems, etc, was not an easy task for an team of engineers, not to mention that I mostly had to operate many roles in parallel. I am also a teacher and have my classroom in fablab Sarajevo, where I prepare people for Linux essentials, LPIC1, LPIC2, exams, and I am doing that from pure love and **free of charge**. Recently I did set up of **digital classroom** on Discord community, with attached youtube channel where **I do tutorials on various of topics in the industry**, computers and computers networks, servers, databases, clouds, clusters, load balance, etc... Recent one was delivering kubernetes clusters... What is left important to say is that I am very aware of importance of the security implementation of any systems and therefore I give extra effort in order to be safe. **All my endpoints** that I delivered **have A+ scoring** since all headers are in place. Not to mention importance of dmarc SPF and DKIM. Feel free to check them for yourself using the link here <https://securityheaders.com/?q=enes.bosnic.net&followRedirects=on> You will get this results:

Security Report Summary	
	Site: https://enes.bosnic.net/
	IP Address: 216.70.114.228
	Report Time: 06 Dec 2020 20:34:58 UTC
Headers:	<input checked="" type="checkbox"/> Content-Security-Policy <input checked="" type="checkbox"/> Strict-Transport-Security <input checked="" type="checkbox"/> X-Frame-Options <input checked="" type="checkbox"/> X-Content-Type-Options
	<input checked="" type="checkbox"/> Referrer-Policy <input checked="" type="checkbox"/> Permissions-Policy

But at this very end I would like to say that I am just a n00b & schmo, who don't know nothing, about anything. On page 2 you can find some recommendation letters.

Recommendation letters:

Ever since my first day as an intern on project management, Enes have been a very supportive employee of mine. I must admit that I had no clue about technology and development and to understand the system architecture was not even an option back then. However, Enes gradually introduced me to the world of development and soon became my "go to guy" whenever I had a question. I never felt ashamed of asking him these questions, even though they were very silly. Me made me feel like I could also do this and learn by doing. And that's what I did, mostly by our late server guarding sessions including paint drawings from Enes to explain how servers are functioning and their relation to each other.

Yes, back then Enes was the server guy that took care of everything, including fixing stuff for our development teams and were on server watch 24/7, seven times a week. He was - hands down - one of the most important and experienced employees of Snowfall. He made us feel sure that all was under control and he had fully control over the servers!
And of course, one of them I had most fun with during crunch periods and calmer periods.

I have really enjoyed working together with Enes, he have really contributed to our work and progress within the projects and within maintenance. But also to our team spirit! I do feel jealous of his current and future colleagues, cause they have and will have the luck to work with Enes.

Feel free to contact me if you have any further questions, and I am happy to answer.

Working with Enes is both successful and efficient. He showed enormous knowledge and it's a pleasure to work with him.

Letter of recommendation for Enes Bosnic

It is my great pleasure to write this recommendation for Mr. Enes Bosnic

During my assignment as CEO of UniCredit Leasing BiH, I meet Enes who was our main technician for the Information technology infrastructure.

Enes provided everything IT related for our organization for 5 long years. From November 2007 to December 2011. He established our IT from scratch. Everything we needed was provided by him. Enes established our telecommunication equipment, established networking connections using both, passive and active network components such as panels, routers, switches, firewalls and so on.

Beside networking, Enes was also person who build our physical and virtual servers and services on them. We did not have any problems with his work, and got excellent reports about from our internal and external revisions as well.

Enes also established our Disaster Recovery location for our IT and provided us with detailed documentation of everything.

Enes was also a 'teacher' and he teach our staff how to use the systems and provide us with tips how to do it safely. At that time we gained great results in our business because Enes provided us with IT platform which allowed us to do our job even outside of our office, since he provided us secured remote option, and we was able to finish our contracts with clients at the spot.

Enes had also high programming skills in several programming languages, so he developed tons of tools and applications we used in our everyday business, like internal and external portals, web sites, public credit calculators and so on.

I would honestly recommend Enes as trustworthy and hard working person who is professional in his fields. In case you need any more information, feel free to contact me.

Recommendation letter for Enes Bosnić

It is my great pleasure to write this letter of recommendation for Mr. Enes Bosnić. Enes was employed in NTCHS (member of COMTRADE group) , from 01.08.2004. – 30.11.2006, as a IT Product Manager.

He did all assigned tasks with commitment and high level of enthusiasm. He has demonstrated the ability to work under pressure and to successfully meet deadlines.

Enes has always been flexible and committed to any assignment assigned. His attitude have helped him to easily adapt into our organization and become a fully accepted team member. During his employment in NTCHS he has shown the will to learn new things and to grow in his role.

Enes was attracted within NTCHS because of his excellent technical skills in the area of networking and switching, also his good sales skills. He worked as a IT Product Manager, and he was extremely responsible, punctual and always finishes his tasks in such manner that it exceeds your expectations. In very short time period she has shown great excellence in his product knowledge and customers service skills.

He has maintained web server, web sites, mail server, active directory, in cooperation with a partner built the infrastructure based on Navision software and B2B portal. Enes also worked on small projects as a graphic designer for marketing needs.

I would like to recommend Enes as a very responsible and dedicated employee. He is a hard-working individual who knows how to get the job done.

If you need any further information about Mr. Enes Bosnić, please do not hesitate to contact me.

Sincerely,

Comtrade Distribution d.o.o.

★★★★★ 5.0

very competent and skilled IT personnel. I would definitely recommend him.

Recommendation for Enes Bosnic

During my time at Snowfall AB I had the pleasure to work with Enes, who had the position of Systems and Networks Architect at that time, on a daily basis.

In my role as Technical Team Lead and, my team often had to tackle problems with ever-changing server infrastructure and specifications. Projects often scale in a fast pace, with more dependencies and change requests on infrastructure as development carries on. Thankfully Enes was always a team player with very strong skills in IT architecture and Linux. He always delivered on time, with the right specifications that the task needed. As a person he is social, friendly and has a great sense of humor.

Hearing that he has now left the company for new opportunities, I know that where-ever he ends up, that company will strike gold.

If given the chance – hire Enes. It might be one of the best management decisions in your career.

I'm hoping to get the pleasure to work with him again in the future.

Letter of Recommendation for Enes Bosnic

It is my pleasure to provide this letter of recommendation for Enes Bosnic with whom I worked with in Snowfall AB between 2015-08-01 and 2016-08-30. Enes worked as a System & Network Architect and I was his closest supervisor as Head of Operations at the same time.

I honestly liked working with Enes, and I know him as a truly valuable employee who contribute above and beyond his official responsibilities. He is honest, dependable and an incredibly hard worker. Enes has a vast knowledge in his field and as the most senior member of the team, I relied on him for all our most complex tasks and difficult troubleshooting.

Enes was also instrumental in setting up our internal infrastructure, both for internal use and for productional purposes. Since Snowfall AB has a multitude of projects and customers with different needs, this both included consolidation of systems as well as knowing when not to consolidate and he was equally comfortable with physical server and network hardware as with a cloud-based environment. Enes expertly handled this and took ownership of the whole process.

Enes also has great knowledge in the fields next to his specific area of expertise. He often provided proactive insights to developers regarding coding practices and potential problems with their code, making him a good asset in many projects and critical situations.

Not only was Enes a valued team member, he also acted as a mentor for junior employees, providing answers and support both to the team but also to management. He put time and effort to help other employees educate themselves and always made sure that the tasks given to other team members were not too hard, but still challenging, giving them space to grow.

I also enjoyed working with Enes on a personal level. He has a dry humor and was a perfect cultural fit for Snowfall AB and contributed to a healthy and good atmosphere, both at his local office in Sarajevo, but also when working in Sweden.

I have no problem recommending Enes in any role within his professional field. If you have any questions, don't hesitate to contact me at ol@snowfall.se

Sincerely
Oskar Leijon

Recommendation for Enes Bosnic

I had the pleasure of collaborating with Enes as part of one of my roles in Snowfall AB linked to IT customer support. There I was hands on involved in leading one of the projects which required both technical acumen as well as administration skills.

A sales team which is on daily basis required to be in direct contact with the customer to solve cases and answer questions will need to be fast and concise and here is where Enes made the difference. His technical knowledge as well as the openness to share it with our customer support team made us detect issues faster and send them internally to the right people so that clients would be satisfied and our product continuously developing.

He is also a very friendly person who knows how to handle deadlines and the stress related to them. His positive attitude boosts the team and his dedication is the ace in the sleeve you would always want to have: whether you are sales manager, project manager or technical lead.

I would definitely recommend Enes and I am sure the experience of having him around will be one worth the investment.
